### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dianne Dunn-McKay on 11/18/2010.

The application has been amended as follows:

Claim 1 has been amended to read:

A film cutter apparatus for cutting plastic wrap comprising:

an elongated rail base;

a pair of rails formed at a top surface of said elongated rail base and a channel formed within said rail base and between said rails;

and a blade housing formed of an upper portion and a lower portion;

said upper portion of said blade housing houses a blade but no wheels, a bottom edge of said upper portion of said blade housing protruding on either end from said blade and an end surface being rounded and inclined upwardly and from either end of said bottom edge, said blade is non-rotatably supported in said housing and is angled from said bottom edge of said upper portion and depends from the upper portion to the lower portion and can cut in both directions;

said lower portion of said blade housing slidably moving in said channel, wherein said pair of rails are formed of a first material comprising polyvinyl chloride comprising at least

10% plasticizer which provides an attraction to said plastic wrap received over said rails for attracting said plastic wrap received over said rails for clinging said plastic wrap to said rails before, during and after cutting of said plastic wrap by sliding said blade housing within said channel, wherein ~~said first material is polyvinyl chloride, said polyvinyl chloride comprising at least 10% plasticizer wherein~~ said elongated base rail is formed of ~~a second material of a~~ second, different material of rigid vinyl or rigid PVC and said first material is coextruded with said second material.

Claim 19 has been amended to read:

A method for cutting a plastic wrap comprising  
~~an elongated rail base;~~  
~~at least one rail formed at a top surface of said elongated rail base;~~  
providing the film cutter of claim 1;

receiving said plastic wrap over ~~a~~said pair of rails ~~formed at a top surface of an elongated rail base;~~  
clinging said plastic wrap to said rails, ~~said rails are formed of a material which provides an attraction to said received plastic wrap for clinging of said plastic wrap to said rails wherein said material is selected from the group consisting of vinyl and polyvinyl chloride, said polyvinyl chloride comprising at least 10% plasticizer, said elongated base rail is formed of a second material of rigid vinyl or rigid PVC and said first material is coextruded with said second material;~~

and cutting said plastic wrap with a said blade, ~~said blade being housed in a blade housing, said blade is angled from said bottom edge of said upper portion, said blade housing being slidably moveable in a channel formed within said rail base between said rails,~~  
wherein said plastic wrap clings to said rails before, during and after cutting of said plastic wrap.

### ***Allowable Subject Matter***

2. Claims 1, 2, 8-10, and 12-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: The application includes a number of affidavits and other evidence of secondary

considerations which were of some minor weight in evaluating the claimed subject matter. Each claimed feature of the claims is seen or known in the prior art, however it is the unique combination that makes rejection of the combined features untenable. While Lucas and Wankow disclose substantially all of the claimed features, restricting the housing and blade to a non-wheeled non-rotating blade makes rejection over Lucas difficult if not impossible due to the necessity to destroy the base reference in order to change the style of cutting and associated features. Potentially Capitao (US 5,758,559) discloses a rail cutter with more of the housing features and discloses that the plastic wrap clings to the single material of the rails, but there is no teaching then to have the substrate be some other divergent material in a more difficult formation process. Capitao also lacks a specific teaching of the positioning and style of the blade, which would need to be modified. Capitao does not disclose that the reason for the attraction of film is due to any amount of plasticizer, so the material would need to be modified also. The numerous modifications, though individually simple, begin to cross into the realm of hindsight. A rejection of the detailed combination of the claims in view of Capitao (and secondary art) would not be tenable. The balance of evidence does not support a prima facie showing that the claims as written are unpatentable, as set forth above..

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
